

CLAIMS

What is claimed is:

1. A stuffed toy comprising at least one movable member constructed of flexible material and movable to either of a first position in which the moveable member is visible and a second position in which the moveable member is at least partially concealed from view.
2. The stuffed toy of claim 1 further comprising a face, and at least one eye and at least one eyelid both attached to the face, and a pocket positioned proximate to the eyelid wherein the eyelid is capable of being positioned in a first position in which the eyelid is over the eye or alternatively in a second position in which the eyelid is at least partially concealed within the pocket.
3. The stuffed toy of claim 2 wherein the pocket is formed by the attachment of a first portion of the eyelid to the face, and a second portion of the eyelid is capable of being positioned at least partially within the pocket.
4. The stuffed toy of claim 2 wherein the pocket is formed by the attachment of the eye to the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.
5. The stuffed toy of claim 2 wherein the pocket is formed within the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.
6. The stuffed toy of claim 1 further comprising a face, a mouth and a tongue both attached to the face, and a pocket positioned within the mouth wherein the tongue is

capable of being positioned in a first position protruding from the mouth or alternatively in a second position in which the tongue is at least partially concealed within the pocket.

7. The stuffed toy of claim 1 further comprising a face, a mouth and at least one tooth both attached to the face, and a pocket positioned within the mouth wherein the at least one tooth is capable of being positioned in a first position protruding from the mouth or alternatively in a second position in which the at least one tooth is at least partially concealed within the pocket.

8. The stuffed toy of claim 6 further comprising at least one tooth attached to the face wherein the at least one tooth is capable of being positioned in a first position protruding from the mouth or alternatively in a second position in which the at least one tooth is at least partially concealed within the pocket.

9. The stuffed toy of claim 6 further comprising at least one eye and at least one eyelid both attached to the face, and a pocket positioned proximate to the eyelid wherein the eyelid is capable of being positioned in a first position in which the eyelid is over the eye or alternatively in a second position in which the eyelid is at least partially concealed within the pocket.

10. The stuffed toy of claim 9 wherein the pocket is formed by the attachment of a first portion of the eyelid to the face, and a second portion of the eyelid is capable of being positioned at least partially within the pocket.

11. The stuffed toy of claim 9 wherein the pocket is formed by the attachment of the eye to the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.

12. The stuffed toy of claim 9 wherein the pocket is formed within the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.

13. The stuffed toy of claim 7 further comprising at least one eye and at least one eyelid both attached to the face, and a pocket positioned proximate to the eyelid wherein the eyelid is capable of being positioned in a first position in which the eyelid is over the eye or alternatively in a second position in which the eyelid is at least partially concealed within the pocket.

14. The stuffed toy of claim 13 wherein the pocket is formed by the attachment of a first portion of the eyelid to the face, and a second portion of the eyelid is capable of being positioned at least partially within the pocket.

15. The stuffed toy of claim 13 wherein the pocket is formed by the attachment of the eye to the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.

16. The stuffed toy of claim 13 wherein the pocket is formed within the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.

17. The stuffed toy of claim 8 further comprising at least one eye and at least one eyelid both attached to the face, and a pocket positioned proximate to the eyelid wherein the eyelid is capable of being positioned in a first position in which the eyelid is over the eye or

alternatively in a second position in which the eyelid is at least partially concealed within the pocket.

18. The stuffed toy of claim 17 wherein the pocket is formed by the attachment of a first portion of the eyelid to the face, and a second portion of the eyelid is capable of being positioned at least partially within the pocket.

19. The stuffed toy of claim 17 wherein the pocket is formed by the attachment of the eye to the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.

20. The stuffed toy of claim 17 wherein the pocket is formed within the face, and a portion of the eyelid is capable of being positioned at least partially within the pocket.
